EDUCATION

Ramdeobaba University

BTech in Computer Science

Nagpur, Maharashtra

2024 – 2028

EXPERIENCE

The Good Fats

Sept 2025 – Jan 2026

Shopify Developer

- Led end-to-end Shopify store development for The Good Fats, from initial setup to launch, ensuring a seamless, high-performance e-commerce experience.
- Customized and optimized Shopify themes with responsive design, enhanced UI/UX, and performance tuning to maximize user engagement and conversion rates
- Implemented full-stack e-commerce solutions including payment integrations, product catalog setup, custom functionalities, and deployment—delivering a fully operational online store.

Google Developers Group NGP

Mar 2026 – Present

Web Developer

- Contributed to community-driven web development initiatives with GDG Nagpur, building and refining frontend/backend features using modern web technologies
- Collaborated with a team of developers to design and implement scalable APIs, while continuously improving application performance, responsiveness, and overall user experience through optimized code and efficient system design
- Participated in technical discussions, code reviews, and knowledge-sharing sessions to strengthen practical development skills

PROJECTS

EventBreakers | *React , TailwindCSS , Node.js , Express.js , MongoDB , JWT , Cloudinary , NodeMailer*

- Developed a full-stack event registration platform with React, Tailwind CSS, and Node.js/Express, implementing protected admin/user routes, JWT authentication, and role-based access control.
- Engineered scalable RESTful APIs with middleware-driven authentication, global error handling, and MongoDB for efficient data storage and retrieval, ensuring robust backend performance.
- Integrated Cloudinary for secure file uploads and optimized media management, Implemented NodeMailer to send personalized emails to users.

Bookly | *Python, FastAPI, PostgreSQL, SQLAlchemy, Celery, Redis, JWT, FastMail*

- Built a scalable Book Review backend using FastAPI, PostgreSQL, and SQLAlchemy, implementing full CRUD for users, books, and reviews with optimized database interactions
- Developed secure JWT-based authentication (login/signup, protected routes) with Redis-backed token blacklisting and caching for improved performance and session management
- Integrated FastMail and Celery with Redis for asynchronous email verification and background tasks, while maintaining clean architecture and centralized error handling for reliability and scalability

ACHIEVEMENTS/HACKATHONS

Stellar Ragnarok: Only team to successfully complete all assigned tasks, showcasing consistency, technical proficiency, and problem-solving under deadlines.

Hack-On: Secured 5th place out of 50 teams at HackOn (GCOEN), showcasing innovation and problem-solving in a competitive hackathon environment.

TECHNICAL SKILLS

Languages: Python , TypeScript , SQL , C++ , Golang (Exploratory)

Frameworks/Libraries: React, Next.js, Node.js, Express.js, FastAPI, Redis, TailwindCSS

Data Systems: MongoDB , PostgreSQL , Redis

Infra/Developer Tools: GitHub, Vercel, VSCode, Postman, Docker, Render, OpenCode
